### ROYALS REPORT DUCHESS KATE

Though she was visiting a new facility owned by over-the-top supercar maker McLaren, the young royal didn't opt for an flashy fresh look Wednesday and instead decided to recycle a classy coat-dress from her enviable wardrobe. She wore the prim royal-blue belted Eponine coat dress with a pleated skirt for the opening of McLaren Automotive's new Composites Technology Centre in Rotherham, England, a little more than three hours northwest of London. She opened the British carmaker's new design center with her husband, Prince William.
